

Instructions for Authors (continued)

Copyright

Copyright on all published articles will be held by the Arthroscopy Association of North America (AANA). In view of the present United States copyright law, each coauthor of a submitted manuscript must sign a form expressly transferring copyright in the event that a paper is accepted for publication in the Journal. Copies of this form are available online in the current issue at www.arthroscopyjournal.org and the form also appears in each print issue of the Journal.

Your Manuscript on Diskette: Guidelines for Preparing and Submitting a Diskette

These guidelines are a supplement to the standard instructions for authors.

General Submission Requirements

- The hard-copy version of your manuscript **must exactly match the file on your diskette**.
- Include on the diskette label the manuscript title and author name(s), the software used, and the file name of the manuscript.

Software Recommendation

- Microsoft Word is the recommended word-processing software.
- Write-protect your diskette before submitting it: slide the tab to the open position.

File Organization

- All components of the manuscript must be included in a single electronic file, on a single diskette.
- The reference list, figure legends, and tables must appear at the end of the manuscript.
- Please refrain from using end notes or automatic list numbering as references because these features are lost during production by the publisher; instead, type reference numbers in parentheses in the text (avoid superscript!) and type the reference list at the end of the manuscript.

Document Formatting

Typographical formatting will be handled by the publisher. This pertains to design specifications for the final printed product, such as column width, page depth, and type styles. Please refrain from using non-standard formatting in your manuscript.

Editorial formatting may be included in the disk file. This refers to attributes such as italics, superscripts/subscripts, and

Greek letters. **The coding scheme for each such element must be consistent throughout the file.**

Text Style

- Type text flush left (i.e., do not indent paragraphs), using upper and lowercase letters as appropriate.
- Enter only one space after punctuation.
- For line breaks within a paragraph, use the automatic “wraparound” feature of your word processor (also referred to as a “soft return”); do not use the carriage return or –enter– key (“hard return”).
- Use two hard returns at the end of each paragraph (i.e., one blank line should appear between paragraphs).
- Use two hard returns between headings and text.
- Do not use the word processor’s indenting or margin-setting features. (These will be handled by production during typesetting.)
- Do not justify the right margin of your manuscript.

By following these guidelines, you will expedite the production process. Whenever feasible, the publisher will use the version of your manuscript on diskette. Because of the complexity of some tabular material, it may be necessary to re-key data from the hard copy. Please note that diskettes will not be returned to authors.

Submission of Electronic Images

Figures may be submitted on diskette in an electronic format. Images should be in EPS or TIF format on a Zip disk, CD-R, or floppy diskette. Graphics software such as Photoshop or Illustrator should be used to create your illustrations. Do not use presentation software such as PowerPoint, CorelDraw, or Harvard Graphics. Color images must be CMYK, of at least 300 DPI resolution, and accompanied by a digital color proof, not a color laser print or color photocopy (this proof will be used at press for color reproduction). Gray scale images must have at least 300 DPI resolution and must be accompanied by a proof. Combinations of gray scale and line art must be at least 1200 DPI resolution and accompanied by a proof. Line art (black-and-white or color) must be at least 1200 DPI resolution and accompanied by a proof. Please include on the label of your diskette all hardware and software information, in addition to file names.

Author Inquiries

Visit Elsevier’s Author Gateway at <http://authors.elsevier.com> for detailed information on preparing electronic artwork, tracking accepted articles, and setting up e-mail alerts to inform you of any change in an article’s status. The Author Gateway also provides a Guide for Authors that includes much of this same material, including instructions for authors, copyright information, frequently asked questions, and more.
