CONTENTS

-
- | | | |
|--------------------------|------------|---|
| EDITORIAL | 893 | What Is the Optimum Insertion Angle of a Suture Anchor?
<i>James H. Lubowitz, Matthew T. Provencher, Michael J. Rossi, and Jefferson C. Brand</i> |
| ORIGINAL ARTICLES | 895 | Reprint of: The Deadman Theory of Suture Anchors: Observations Along a South Texas Fence Line
<i>Stephen S. Burkhart</i> |
| | 900 | The Effect of Insertion Angle on the Pullout Strength of Threaded Suture Anchors: A Validation of the Deadman Theory
<i>Todd A. Clevenger, Michael J. Beebe, Eric J. Strauss, and Erik N. Kubiak</i> |
| | 906 | Effect of Ultrasonographically Guided Axillary Nerve Block Combined With Suprascapular Nerve Block in Arthroscopic Rotator Cuff Repair: A Randomized Controlled Trial
<i>Jae Jun Lee, Do-Young Kim, Jung-Taek Hwang, Sang-Soo Lee, Sung Mi Hwang, Gi Ho Kim, and Yoon-Geol Jo</i> |

On the Cover: This is a case of a 52-year-old man with a history of massive rotator cuff tear of the right shoulder. The image displays a final arthroscopic view of the complete massive rotator cuff repair with use of extracellular matrix graft augmentation. The graft is incorporated using a medial row load-sharing technique. View the accompanying video at www.arthroscopyjournal.org and read the full article at www.arthroscopytechniques.org. Courtesy of Andres M. Alvarez, M.D., M.Sc., and Gregory J. Gilot, M.D.
