

Arthroscopy

The Journal of Arthroscopic
and Related Surgery

Official Publication of the Arthroscopy Association of North America

Table of Contents: Volume 38 • Number 11 • November 2022

EDITORIAL

- 2943** Early Treatment of Shoulder Pathology Is Necessary but Not Enough Is Being Performed
James H. Lubowitz, Jefferson C. Brand, and Michael J. Rossi

LETTER TO THE EDITOR

- 2954** Superior Capsular Reconstruction—Technical Marvel or Fading Fashion?
Alexandre Lädermann and Mustafa Rashid

INFOGRAPHIC

- 2957** Dermal Allograft Augmentation for Rotator Cuff Tears
Ignacio Pasqualini, Mariano E. Menendez, Javier Ardebol, and Patrick J. Denard

ORIGINAL ARTICLES

- 2960** Anterolateral Acromioplasty Does Not Change the Critical Shoulder Angle and Acromion Index in a Clinically Relevant Amount
Sophie Thiesemann, Florian Kirchner, Milad Farkhondeh Fal, Sebastian Albers, and Jörn Kircher
- 2969** *Editorial Commentary:* Classic Arthroscopic Anterolateral Acromioplasty Does Not Translate to Clinically Meaningful Differences in Lateral Acromial Overcoverage
Brian R. Waterman

On the Cover: Right shoulder posterior subacromial view portal viewed with a 70-degree arthroscope. A) There are initially dense adhesions in the subcoracoid space which are gently cleared by following the rotator cuff (RC) medially until, B) the tip of the coracoid (CT) is identified. C) Dissection continues along bone until the base of the coracoid is identified, the subscapularis (SSc) is seen (if intact), and the glenosphere is visualized posterior to the subscapularis (white arrow). See the related article at www.arthroscopytechniques.org. Courtesy of Javier Ardebol, M.D., Ignacio Pasqualini, M.D., Robert U. Hartzler, M.D., Justin W. Griffin, M.D., Evan Lederman, M.D., and Patrick J. Denard, M.D.

- 2972** Bankart Repair With Remplissage Restores Better Shoulder Stability Than Bankart Repair Alone, and Medial or Two Remplissage Anchors Increase Stability but Decrease Range of Motion: A Finite Element Analysis
Sijia Feng, Huizhu Li, Yuzhou Chen, Jun Chen, Xiaoxi Ji, and Shiyi Chen
- 2984** *Editorial Commentary:* For Shoulder Hill-Sachs Lesion Remplissage, Medial Anchor Position Must Be Optimized to Achieve Stability Yet Minimize External Rotation Loss
Phob Ganokroj, Ryan J. Whalen, and CAPT. Matthew T. Provencher
- 2987** Decellularized Bovine Pericardial Patch Loaded With Mesenchymal Stromal Cells Enhance the Mechanical Strength and Biological Healing of Large-to-Massive Rotator Cuff Tear in a Rat Model
In Kyong Shim, Michael Seungcheol Kang, Eui-Sup Lee, Jae Hee Choi, Yu Na Lee, and Kyoung Hwan Koh
- 3001** Black Race, Hispanic Ethnicity, and Medicaid Insurance Are Associated With Lower Rates of Rotator Cuff Repair in New York State
Alan Hwang, Linda Zhang, Gabriel Ramirez, Michael Maloney, Ilya Voloshin, and Caroline Thirukumaran
- 3011** *Editorial Commentary:* Racial and Economic Inequity Leads to Diminished Access to Rotator Cuff Repair: We Treat as One
Robert Meislin
- 3013** Preoperative Magnetic Resonance Imaging Offers Questionable Clinical Utility, Delays Time to Hip Arthroscopy, and Lacks Cost-Effectiveness in Patients Aged ≤ 40 Years With Femoroacetabular Impingement Syndrome: A Retrospective 5-Year Analysis
Prem N. Ramkumar, J. Matthew Helm, Ava S. Berrier, Jose F. Vega, Sercan Yalcin, Kyle N. Kunze, Joshua D. Harris, and Benedict U. Nwachukwu
- 3020** *Editorial Commentary:* Routine Preoperative Magnetic Resonance Imaging for Hip Arthroscopy Is Wasting Health Care Dollars and Delaying Surgical Intervention: Decision Making Should Be at the Discretion of the Health Care Provider Not Mandated by Health Care Insurers
Christopher M. Larson
- 3023** Patient-Reported Outcomes Measurement Information System Mobility Computerized Adaptive Testing Maintains High Correlation and Low Test Burden Compared With Legacy Hip-Specific Instruments in Patients Undergoing Hip Arthroscopy for Femoroacetabular Impingement
Molly A. Day, Kyle J. Hancock, Ryan S. Selley, Reena J. Olsen, Vinicius C. Antao, Anil S. Ranawat, Danyal H. Nawabi, and Bryan T. Kelly
- 3030** Competitive Athletes Who Underwent Hip Arthroscopy With Capsular Repair Showed Greater Improvement in Patient-Reported Outcome Scores Compared With Those Who Did Not Undergo Repair
Andrew E. Jimenez, Michael S. Lee, Jade S. Owens, Olivia A. Paraschos, David R. Maldonado, and Benjamin G. Domb
- 3041** *Editorial Commentary:* The Importance of Capsular Closure Following Hip Arthroscopy—Leave No Trace: An Outdoorsman’s Ramblings
Andrew B. Wolff and John P. Scanaliato

- 3043** Functional Resistance Training After Anterior Cruciate Ligament Reconstruction Improves Knee Angle and Moment Symmetry During Gait: A Randomized Controlled Clinical Trial
Alexa K. Johnson, Scott R. Brown, Riann M. Palmieri-Smith, and Chandramouli Krishnan
- 3056** *Editorial Commentary:* Gait Symmetry After Anterior Cruciate Ligament Reconstruction Is Improved Using Functional Rehabilitation Braces That Resist Knee Motion
Jacopo Emanuele Rocchi
- 3058** Double-Tunnel Technique Was Similar to Single-Tunnel Technique in Clinical, Imaging and Functional Outcomes for Medial Patellofemoral Ligament Reconstruction: A Randomized Clinical Trial
Yi Qiao, Junjie Xu, Zipeng Ye, Jiebo Chen, Xiuyuan Zhang, Song Zhao, Caiqi Xu, and Jinzhong Zhao
- 3068** *Editorial Commentary:* Two Fixation Points Are Better for Medial Patellofemoral Ligament Reconstruction—To Minimize Complications, Bone Tunnels Should Be Avoided
Sabrina Strickland
- 3070** Smaller Iatrogenic Defects Created by Inside-Out Compared With All-Inside Meniscus Repair Devices in Human Cadaveric Model
David A. Calafiore, Robert A. Magnussen, Joshua S. Everhart, Alex C. DiBartola, Eric M. Milliron, Christopher C. Kaeding, and David C. Flanigan
- 3080** Concomitant Meniscotibial Ligament Reconstruction Decreases Meniscal Extrusion Following Medial Meniscus Allograft Transplantation: A Cadaveric Analysis
Nolan B. Condron, Derrick M. Knapik, Ron Gilat, Amar S. Vadhera, Daniel Farivar, Elizabeth F. Shewman, Adam B. Yanke, Jorge Chahla, and Brian J. Cole
- 3090** *Editorial Commentary:* Restoring Native Meniscal Anatomy With Medial Meniscus Allograft Transplantation and Augmentation of the Meniscotibial Ligament May Decrease Meniscal Graft Extrusion
Neel K. Patel
